Japanese Immigration.

"Immigration to this country from Japan has brought a higher class with the laborers, and one whose coming is a compliment to our educational system. Education is relatively hard to get in Japan, where wages are so low that a student can not afford to support himself and go to school, too. But the public schools in San Francisco and the two great universities at Berkeley and Palo Alto are free to them, and ambitious young men of the upper classes have been glad to come to California, where they could work as servants in private households and hotels while preparing to take their degrees. To such an extent does this practice prevail that two years ago it was estimated that there were 5,000 Japanese seeking education in California alone. Only about 1,225 were on the whole Pacific coast in 1890. In the next two years 2,643 arrived at San Francisco, and many more came by way of Victoria and the northern ports. The arrivals in San Francisco were 1,830 in 1893, 1,667 in 1894, 1,150 in 1895, 561 in 1897, 826 in 1898, 1,667 in 1899, and 2,644 for the fiscal year just ended.—Ainslee's Magazine.

Art of Letter Writing.

In the good old days when postage was so high people wrote small hands and crowded a great deal of news and gossip into a letter, seldom using more than a single sheet, writing on both sides and crossing the lines. The habit of crossing fingers yet with some women. With the advent of cheap postage chirography changed its style, leaping at a bound from the inclined infinitesimal to the nearly vertical vast and unrestricted. Note paper of the ordinary width sustains but a single word to the line, whereas three-quarters of a century ago twenty words might have been written in the same space. There can be no doubt that cheap postage has destroyed the art of letter writing.
